

11th Annual BMDA Conference
**“THE ROLE OF MANAGEMENT EMPOWERING INNOVATIONS
AND CREATIVITY”**

May 9th – 10th 2013, Kaunas, Lithuania
Hosted by: Kaunas University of Technology

CONFERENCE FOCUS AND OBJECTIVES

Business Organizations and Academic Institutions are constantly operating in fast changing and highly competitive environment. In the twenty-first century the traditional way of acting and doing business do not guarantee success neither for business corporations nor education institutions. The success of any organization is determined by its ability to activate inner intellectual capital within organization and constantly come up with the new ideas and innovative approaches.

Nowadays creativity, innovations and effective use of knowledge are vitally important success factors to succeed and prosper in any field of activities. It does not matter what size company is and what sector of industry it operates. The most significant task for any of them –awakening of creative and innovative potential with organization. Awakening and developing it in sustainable way. For that clear procedures and mechanism that assure the transformation of individual creativity into a corporate asset should be allocated. The Conference is going to approach those and other challenges and look for the solutions.

As every year, this BMDA Annual Conference is focusing on the partnership and cooperation of business organizations and academic institutions, believing that such cooperation will enable to fill in the gap between theory and practice of organizing creativity and innovations to be useful for any type of organisation.

The Conference objective is to bring together representatives from the Corporate world and Academia to share insights and exchange ideas on how creativity and innovations could be initiated, developed and nurtured in order to assure sustainability of organisation. The participants of the Conference are going to analyze those issues from the four perspectives – individual (the role of a leader), group (the role of management team), inter institutional (the role of cooperation and sharing) and education impact. We look forward to welcome everybody, who has the ideas and ready to share them!

Host Institution:
