№ 08/1039

«23» 11 2011/ж

Dear Colleagues!

One of the priorities of the IAB development is the internationalization of the faculty and students. Internationalization process allows, on the one hand, increase the international dimension of the internal educational environment of the university, on the other hand, make higher education more attractive in foreign markets, and for foreign students.

In this vein, the implementation of joint educational programs with foreign partners is a top priority for IAB. Joint educational programs with our partner universities are one of the most effective tools for the development of academic mobility, successful teaching practices, learning, building trust and understanding. Implementation of joint programs requires professionalism at all stages of their initiation, development, launch, implementation and quality control.

In this regard, additional efforts are needed for further integration of best practices for the faculty exchange for the effective conduct of research. The best teachers of IAB reasserted themselves in the national contest "The best teacher in Kazakhstan", in order to win a scholarship for further implementation of research projects, self-education work and adoption of the best pedagogical practices.

On behalf of the whole International Academy of Business I personally appeal to my partner university and kindly ask you and send till the end of November individual invitations for teachers of IAB with the proposal to visit your university and to do a middle-term research on the basis of your school. We enclose to this letter list of those teachers that focus on academic mobility and the desire to conduct joint research with IAB partners.

Sincerely,

Rector of IAB

Assylbeck Kozhakhmetov
